ACHIEVING MISSION SUCCESS THROUGH DIGITAL TRANSFORMATION

XCELLIGEN ADVANTAGE

Xcelligen, since 2014 has been providing professional services and information technology expertise, with forward-learning and innovate practical solutions for both government and commercial clients.

The name Xcelligen is derived from the 'excellence' and 'intelligence' which reflects the drive to bring cutting-edge, breakthrough solutions to the table. We make effective use of technology to improve customer satisfaction and results.

DIFFERENTIATORS

- Modernized and migrated over 10 workloads and 200 servers enabling PaaS and IaaS
- Developed more than 100 automation scripts using open-source technologies to enhance DevSecOps pipelines
- Crafted application configuration playbooks for building enterprise servers i.e. GitHub, Ansible Tower, Tenable etc.
- Automated the provisioning of more than 100 VMs/Instances through DevSecOps pipelines
- Migrated dozens of Mission Applications from on-premises to the Government Cloud
- Developed over 30 PowerBI dashboards using data from more than 10 data sources
- Enhanced infrastructure security with Security Technical Implementation Guide (STIG) automation playbooks
- Migrated databases from legacy systems to the cloud and modernized the data for improved accessibility

CORE COMPETENCIES:

DIGITAL TRANSFORMATION

- Technology (Modernization / Optimization)
- Automation - DevSecOps, Infrastructure Automation, Infrastructure As Code
- Accelerated DevSecOps
- Agile Transformation

DATA MODERNIZATION

- Decommission Legacy Systems
- Data Analytics
- Data Engineering
- Agile DataOps

ARTIFICIAL INTELLIGENCE

- Machine Learning Modeling
- Deep Learning
- Natural Language Processing (NLP)
- Text Analytics

CLOUD ENABLEMENT

- Cloud Management
- Multi-Cloud Strategy
- Cloud Transformation
- Observability and Monitoring

CYBERSECURITY

- Cloud Security
- Infrastructure Security
- Application Security
- Network Security
- Security Compliance

FEDERAL GOVERNMENT

U.S. Air Force: Cloud One

Common Computing Environment (CCE)-AF Application Analysis;
Common Computing Environment (CCE)-AF Application Migration;

U.S. Air Force: EITaaS C&S

Software Engineering; Application Development; Migration Process and Infrastructure, including approval for tools residing on USAF/DoD Networks; setup Application Discovery Toolset and Application Migration Capability; Application and Infrastructure Migration Planning and Design.

U.S. Air Force: Data One

Software Engineering; Implementation of Cloud One common services on Azure IL6 to achieve ATO; implementation of IATT Architecture on Azure IL6 and in Sequoia.

U.S. Air Force: Azure Support

Infrastructure Development; Azure Landing Zone Design; Coding Support; Code blueprints (ARM templates), GitLab, Bicep/Terraform using CI/CD Pipeline; Azure Policy and Other Azure Infrastructure.

DoD: Defense Technical Information Center (DTIC)

Modernization of DTIC's systems - including data storage, web interface, AI/ML services, Azure Cognitive Services - and transition DTIC to the Cloud One IL5 and IL6 environments.

U.S. Transportation Command (USTRANSCOM Command)

Infrastructure Automation, Security Technical Implementation Guide (STIG) Automation; AWS; DevOps Services; CHEF and Ansible, STIG Remediation Cookbooks and Validation Controls; JIRA and Confluence Documentation.
